PROFILE

Highly motivated Graduate Software Engineer completing an MSc in Web Development, specializing in React and TypeScript. I enjoy identifying real-world problems and designing software that improves how people work and interact with technology. Proven ability to design, develop, and deploy API-driven web applications and responsive user interfaces from concept to production. Experienced in modern AI-assisted development workflows, utilizing tools like Cursor and ChatGPT to accelerate research and prototyping while maintaining ownership of engineering decisions. Seeking a Junior or Graduate Software Engineer, Front-End, or Product Engineering role to contribute to innovative digital products.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, HTML5, CSS3, React, Next.js, React Router, Responsive Design, UI/UX Design

Web Development Concepts: REST APIs, Authentication, API Integration, CRUD Applications

Databases: SQL, PostgreSQL

Tools: Git, GitHub, VS Code, Vite, Figma, Vercel, npm

Development Practices: Version Control, Database Design, Software Design, Responsive Development

SELECTED PROJECTS

MSc Thesis: Educational Software Synthesizer (C++ & DSP) | Designer & Developer

- Designed, implemented, and evaluated a novel goal-oriented educational software synthesizer interface, significantly improving perceived usability for novice users without compromising functionality.
- Developed two functionally identical synthesizer interfaces (conventional and educational) using a shared Digital Signal Processing (DSP) engine, isolating interface design as the primary variable.
- Conducted a controlled usability study and applied Human-Computer Interaction principles to improve educational software design.

RESTBOO | Lead Front-End Engineer

- Developed and owned the complete front-end for a large-scale restaurant booking and management platform, significantly enhancing user experience for customers, restaurant partners, and administrators.
- Implemented complex booking workflows, secure messaging systems, profile management, and analytics dashboards, leading to improved operational efficiency and user engagement.
- Collaborated using Git and GitHub within a multi-developer team, integrating diverse REST APIs, authentication, and map-based functionality to create a robust, role-based user experience.

World Cup Predictor | Designer & Developer

- Designed, built, and deployed a tournament prediction platform used by 21 participants, replacing manual spreadsheet scoring and group chat submissions for a private football competition.
- Implemented fixture predictions, outright selections, automated scoring, and leaderboards, eliminating manual score calculation across 104 fixtures and improving user satisfaction.
- Delivered a production-ready application using Next.js, React, TypeScript, Supabase, PostgreSQL, and Vercel.

MOVIE MATCH | Designer & Developer

- Developed a mood-based movie discovery platform using the TMDB API with filtering, watchlists and personalised recommendations.
- Designed responsive interfaces with a strong focus on usability, accessibility and future community features.

PROFESSIONAL EXPERIENCE

Freelance Front-End Developer | 2024 – Present

- **Emerald Eats (Client Project), London | September 2025** ● Developed a bespoke, responsive website for a food truck business, enhancing their online presence and customer engagement.
- Implemented an intuitive menu display and contact form, improving customer order inquiries and streamlining communication.
- Designed, developed, and deployed responsive websites and web applications for various clients, translating business needs into technical solutions.
- Managed projects from planning through development and ongoing maintenance, ensuring timely delivery and client satisfaction.

Prior Experience: Worked professionally in live sound engineering, hospitality, and largescale event operations, developing strong transferable skills in problem-solving, teamwork, and communication.

EDUCATION

MSc Web Development | Expected 2026 (Projected 2.1)

Higher Diploma in the Science of Computing | Griffith College Dublin (2021)

Professional Diploma in Front-End Web Development | UCD Professional (2024)

BA (Hons) Music Production | Pulse College (2019)
