STEPHEN LYNE

Graduate Software Engineer | Full-Stack & Front-End Developer MSc Web Development | Open to Relocation Across the UK & Ireland

GitHub: Stephen Lyne | Portfolio: Stephen Lyne | LinkedIn: Stephen Lyne

PROFILE

Graduate Software Engineer with an MSc in Web Development, specialising in React and TypeScript. Experienced in designing, developing and deploying full-stack, API-driven web applications and responsive user interfaces from concept to production. Strong foundation in software engineering, databases and object-oriented programming, with experience working independently and within multi-developer teams.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, Python, Java, SQL, HTML5, CSS3 **Frontend**:
React, Next.js, React Router, Responsive Design, UI/UX Design
Backend & APIs: Node.js, Express.js, REST APIs, Authentication, API Integration
Databases: PostgreSQL, MySQL, Supabase, Prisma
Tools & Platforms: Git, GitHub, Docker, Linux, Vite, Vercel, Figma, npm
Development Practices: OOP, Automated Testing, Database Design, Software Design

SELECTED PROJECTS

MSc Thesis: Educational Software Synthesizer (C++ & DSP) – Distinction (72%)

- Designed and implemented two functionally identical C++ software synthesizer interfaces backed by a shared DSP engine, isolating interface design as the primary variable.
- Designed and evaluated a goal-oriented educational interface through a controlled usability study, applying HCI principles to improve perceived usability for novice users.

RESTBOO | Lead Front-End Developer — MSc Team Project

- Led front-end development in a multi-developer MSc team, building role-based interfaces for customers, restaurant partners and administrators and integrating REST APIs, authentication and map-based functionality.
- Collaborated through Git/GitHub to integrate the front end with the team's backend services and deliver a responsive booking and management experience.

World Cup Predictor | Designer & Developer

- Designed, built and deployed a full-stack tournament prediction platform using Next.js, React, TypeScript, Supabase, PostgreSQL and Vercel, replacing manual spreadsheet scoring and group-chat submissions for a competition with 21 participants.

- Implemented fixture predictions, outright selections, automated scoring and live leaderboards across 104 fixtures, eliminating manual score calculation.

MovieMatch | Designer & Developer

- Developed a responsive mood-based movie discovery platform using React, React Router and the TMDB API, with curated recommendations, filtering and persistent watchlists.

- Implemented automated testing with Vitest, React Testing Library and Playwright across unit, component, integration, API-service and end-to-end user flows, with GitHub Actions CI running tests automatically on pushes and pull requests.

PROFESSIONAL EXPERIENCE

Emerald Eats (Client Project), London | **September 2025**

- Designed, developed and deployed a bespoke responsive website for a London food truck business based on client requirements.

- Built an intuitive menu interface and contact functionality, translating business requirements into a production-ready web experience.

Prior Experience: Worked professionally in live sound engineering, hospitality, and large-scale event operations, developing strong transferable skills in problem-solving, teamwork, and communication.

EDUCATION

MSc Web Development | University of Roehampton | 2026
Level 8 Higher Diploma in Science of Computing | Griffith College Dublin | 2021 | 2.1 **Professional Diploma in Front-End Web Development** | UCD Professional Academy | 2024 | Merit **BA (Hons) Music Production** | Pulse College | 2019
