TECHNICAL SKILLS	PROFILE
Languages JavaScript • TypeScript • HTML5 • CSS3 • SQL • Python • Java • C++	Front-End Developer currently completing an MSc in Web Development with experience building React and TypeScript applications, client websites, and API-driven web platforms.
Frameworks React • React Router	Experienced in developing responsive and accessible user interfaces, integrating APIs, and creating user-focused digital experiences from concept through deployment.
Tools Git • GitHub • VS Code • Vite • Figma • Vercel	Strong communication, teamwork, and problem-solving skills developed through freelance development, live event production, and customer-facing environments.
Development REST APIs • Authentication • CRUD Applications Responsive Design • Accessibility • UI/UX Design	Currently seeking Graduate or Junior Software Engineer opportunities where I can contribute to modern web products while continuing to develop my technical expertise.
EDUCATION	SELECTED PROJECTS
MSc Web Development Expected Graduation: 2026 (Projected 2.1)	RESTBOO
Higher Diploma in Science of Computing Griffith College Dublin 2.1	Sole Front-End Engineer
Professional Diploma in Front-End Web Development UCD Professional	Built the complete front-end for a large-scale restaurant booking and management platform.
	• Developed customer, restaurant partner, and administrator interfaces. • Implemented booking workflows, messaging systems, profile management, analytics dashboards, and restaurant administration tools. • Integrated REST APIs, authentication systems, image uploads, and map-based features. • Collaborated within a multi-developer team while owning all front-end development.
	Technologies: React, TypeScript, REST APIs, Authentication, CRUD Operations
	GitHub: kot-1999/RestB_FE: Restaurant booking app
	WORLD CUP PREDICTOR

Academy

BA (Hons) Music
Production
Pulse College

Designer & Developer

Designed and developed a tournament prediction platform for a private football competition.

- Implemented fixture predictions, outright selections, automated scoring, leaderboards, and administration tools.
- Replaced manual spreadsheet-based scoring with a dedicated web application.
- Designed and deployed a production-ready solution.

Technologies: React, TypeScript, SQL, Vercel

Live Site: [World Cup Predictor](https://worldcuppredictor.com)

MOVIE MATCH

Designer & Developer

Developed a mood-based movie discovery platform focused on curated recommendations and user experience.

- Integrated TMDB API data to provide dynamic film content.
- Built filtering, watchlists, archive browsing, and recommendation features.
- Designed responsive interfaces with a strong emphasis on usability and visual design.

Technologies: JavaScript, TMDB API, Responsive Design

PROFESSIONAL EXPERIENCE

Freelance Front-End Developer | 2024 – Present

- Design and develop websites and web applications for clients.
- Gather requirements and translate business needs into technical solutions.
- Deliver responsive, accessible, and maintainable web experiences.
- Manage projects from planning and development through deployment.

Crew Member — Showforce | 2024

- Worked on major international events including Glastonbury Festival and the BAFTA Awards.
- Developed strong teamwork, communication, and problem-solving skills in fast-paced environments.

Prior to transitioning into software development, I worked professionally in live sound engineering, hospitality, and large-scale event operations. Full employment history and references are available upon request.
