TECHNICAL SKILLS

Languages
JavaScript • TypeScript • HTML5 • CSS3 • SQL

Familiar With
Python • Java • C++

Frameworks
React • Next.js • React Router

Tools
Git • GitHub • VS Code • Vite • Figma • Vercel • npm

Development

REST APIs
Authentication
API Integration
CRUD Applications
Responsive Design
Accessibility
UI/UX Design
Version Control

PROFILE

Graduate Software Engineer currently completing an MSc in Web Development with experience building React and TypeScript applications, API-driven platforms, and production web products. I enjoy identifying real-world problems and designing software that improves how people work and interact with technology. Experienced in developing responsive user interfaces, integrating REST APIs, and creating intuitive digital products from concept through deployment using modern AI-assisted development workflows. Regularly use AI tools including Cursor, ChatGPT and Manus to accelerate research, prototyping and software development while maintaining ownership of engineering decisions. Seeking a Graduate or Junior Software Engineer, Front-End, Full-Stack or Product Engineering role where I can contribute to modern digital products while continuing to develop my technical expertise.

SELECTED PROJECTS

RESTBOO

Lead Front-End Engineer

Built and owned the complete front-end for a large-scale restaurant booking and management platform serving customers, restaurant partners, and administrators.

- Developed customer, restaurant partner, and administrator interfaces across the platform.
- Implemented booking workflows, messaging systems, profile management, analytics dashboards, and restaurant administration features.
- Integrated REST APIs, authentication, image uploads, map-based functionality, and role-based user experiences.
- Worked within a multi-developer team while taking ownership of all front-end development from implementation through deployment.

Education

MSc Web Development
Expected 2026
(Projected 2.1)

Higher Diploma in the
Science of Computing
Griffith College Dublin
(2021)

Professional Diploma in
Front-End Web
Development
UCD Professional (2024)

BA (Hons) Music
Production
Pulse College
(2019)

World Cup Predictor

Designer & Developer

Designed, built and deployed a tournament prediction platform to replace manual spreadsheet scoring and group chat submissions for a private football competition.

- Implemented fixture predictions, outright selections, automated scoring, leaderboards, and administration tools.
- Designed a dedicated web application that streamlined tournament management and eliminated manual score calculations.
- Delivered a production-ready application using Next.js, React, TypeScript, and Vercel.

Technologies: Next.js • React • TypeScript • CSS • Vercel

MOVIE MATCH

Designer & Developer

Designed and developed a mood-based movie discovery platform to reduce decision fatigue by recommending films based on how users feel rather than requiring them to browse large streaming catalogues.

- Integrated TMDB API data to provide dynamic film recommendations.
- Built filtering, watchlists, archive browsing, and personalised recommendation features.
- Designed responsive user interfaces with a strong focus on usability, accessibility, and visual design.
- Planned the platform as a curated weekly recommendation service, with future expansion into social media content and music recommendations to build an engaged community around discovery.

Technologies: React • Vite • JavaScript • TMDB API • CSS

PROFESSIONAL EXPERIENCE

Freelance Front-End Developer | 2024 – Present

- Design, develop and deploy responsive websites and web applications for clients.
- Gather requirements and translate business needs into technical solutions.
- Deliver production-ready web applications from planning through development and ongoing maintenance.
- Communicate directly with clients throughout project delivery.

Prior to transitioning into software development, I worked professionally in live sound engineering, hospitality, and large-scale event operations.
